Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

The internet is quickly becoming a utility, from paying bills to telecommuting, people are using the internet as an integral part of their lives. Just as the water company doesn't decide how much water we use or the electric company doesn't decide how much power we use, the ISP's should not determine where we go on the internet. Let website traffic be determined by the usefulness and quality of the site and not by how much the site owner is paying the ISP. If Net Neutrality is not maintained then lives and businesses can be disrupted or even radically altered for the worst, just imagine how companies would have unfair advantages online based on how much they could pay. Within a few years the internet would become the playground of the wealthy and entrepreneurship online would be destroyed because the new companies would not be able to compete against the entrenched companies that have larger financial backing. If you don't believe that companies will do abuse the public just look at the headlines about Comcast and how they already tried to restrict users access to the internet. There are already plenty of blatant examples of the companies taking advantage of the people, just imagine if they are allowed to charge for it. Any number of internet success stories that have occurred in the last 10 years would not happen in that environment. Please vote on the side of the people and not the companies, keep Net Neutrality and help the internet flourish not be choked off by greed. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Mt. Airy, MD 21771

As the parent of three college students, I am very concerned about the issue of keeping the internet neutral, and Comcast has shown us why it is so important. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. We use the internet daily in our family, for many purposes, and pay the ISP to do so. So it doesn't make sense to me that if we want to visit a website, that website must also pay if we want it to download in a reasonable length of time. That's like my paying to mail a letter, and the post office also charging the recipient before it delivers the letter to them. Many of the sites we use are informational and cannot afford the fees that would be charged. For example, my youngest daughter is

diabetic so we frequently visit sites that help her deal with her diabetes; most of these sites are run by non-profit organizations with limited financial resources. My children also do research on the internet for their college classes and many of the sites they visit are also not for profit ones. If net neutrality were ended, so would be many of these sites. I urge the FCC to take serious and immediate action to put an end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Many thanks for your interest in my views. I look forward to your response.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Comcast also has a virtual monopoly on cable TV in my area. Their customer service is horrible, but we have no alternative. Business is corrupt, and if lawmakers don't require a degree of fairness, we will be as limited in our choices as former Soviet Union citizens once were to GUM stores.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I am also deeply shocked by Comcast's underhanded and highly undemocratic tactic of packing the meeting room in Boston last week with paid (sleeping!!) placeholders. This violates the spirit of these hearings. Informed citizens cannot make their voice heard in open forums because deep-pocketed firms are packing meeting rooms. This smacks of gangsterism.

Lawrence Doerer
1 Foal Ct
Cockeysville, MD 21030

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. This throttling of information does not stop piracy. As

they thwart what they deem piracy, they also block millions of users that use the same system to send large amounts of legal and commercially viable content such as Linux distributions. With the monopoly Comcast holds in many areas that do not have an alternative Cable and Internet provider, we all lose our rights to make not only the computer industry but the internet, a safer and more valuable asset to the planet. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

My family and I deplore Comcast's blocking of peer-to-peer communications. This is exactly the problem that, for years, millions of Americans have warned would occur without Net Neutrality protections. Please take strong action this year to stop this disastrous practice that will also stop other Internet service providers from following Comcast's example of discriminating against the Internet's free flow of online information. We firmly believe that the Internet is a vital engine for economic growth, civic participation, access to government, and free speech. We are sure that the US cannot afford to allow such corporate gatekeepers to smother these democratic communications by discriminating against new technologies, interfering with Internet traffic and hurting innovation. We thank you in advance for your efforts to keep the Internet's evolving better every year.

Silver Spring, MD 20901

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Keep the Internet open to all!

PLEASE-- Do not confuse so-called "FREE MARKET" forces with "NET NEUTRALITY." Allowing an entity to pay to have their message transported before others destroys the egalitarian nature of the Internet. The Internet is just like on-air television. All I have to do is change channels to receive content. One channel is not allowed to overpower or cover other channels in an attempt to take over the airwaves. The same holds true for the Internet. The Internet is a popularity contest. The most popular gets the most exposure. Everyone has an equal chance of being popular. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. COMCAST and other ISPs do not have to terminate or block users' access to file transfers or high bandwidth sites to manage their own networks. The technology exists to manage network traffic without being deliberately disruptive. A large portion of cable ISP subscribers like myself do not have an alternate ISP. We are locked in to the local cable franchise. We depend on the FCC to oversee these companies so that they do not unilaterally decide to deprive us of reasonable access to services. Even the local telephone company (Verizon) refuses to provide high speed networking services (DSL or FiOS) in my area and I live only 25 miles from the nation's capitol and only 20 miles from Baltimore! Please help us. This isn't just a fight against music or movie piracy nor is this a legitimate effort to manage network bandwidth. This is a fight about providing user access to basic services when there is no reasonable alternative. Thank you.

Elkton, MD 21921

The Internet, as a public network, is a public service. It should be, as such, open for anyone to access any website or to use it in any manner they decide. Comcast's blatant blocking of peer-to-peer networks and then lying about it, is exactly what nobody wants and is exactly what will happen if Net Neutrality protections are not passed. You will be giving a faceless corporation the right to decide what is and isn't appropriate for you to see and use on the Internet. The Internet is, quite simply, the future of America and the world. We simply can not allow a select few corporations choose what we can and can not see. Their one complaint is the apparent cost of upgrading their network to support more usage by its users. They are simply interested in their own gain of profits and not for the expansion of our internet connections. This is why America, basically the creators of the Internet, are not the global leader in the Internet and its technologies. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Gaithersburg, MD 20878

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. It is especially outrageous that Comcast apparently paid mercenary "seat-fillers" who slept through hearings so that members of the

public with legitimate interest and concerns were prevented from being seated. This incident should be investigated and appropriate sanctions applied against Comcast for deliberately blocking public attendance.

Owings Mills, MD 21117

I am a Comcast customer writing to protest Comcast's practice of blocking of peer-to-peer communications. I have personally experienced a drastic slowdown when using Bittorrent software to upload and download. What used to take a few hours now takes a few days. I don't really have a good alternative to Comcast for high speed Internet service, so they essentially have a monopoly and are taking unfair advantage of it. A sympathetic Comcast employee, off the record and while not at work, told me that despite what Comcast says on the web site, they do target Bittorrent downloads and slow them to a crawl. He gave me some suggested workarounds to try, but they did not work for me. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We cannot allow companies who have received special privileges from county government to offer cable services to interfere with the private -- and legal -- communication between customers.

Lexington Park, MD 21117

I have personally witnessed the economic effects of Comcast's violation of net neutrality. I work for Intelligent Devices, Inc., a technology company that produces audio hardware and software for government and law enforcement clients (including Homeland Security). Comcast is our internet service provider. Their "traffic shaping" practices interfered with our ability to do business (by blocking certain applications--not peer-to-peer, incidentally) to the point that we had to threaten to switch to a different provider (with far inferior bandwidth) just to get them to turn it off for our site. If other providers were to follow Comcast's example, we would have had nowhere to turn, nor any leverage to force Comcast to stop filtering our communications. As it was, we took an economic hit from the disruption of business and the time our engineers and management had to spend on the problem. The people who have been warning that Net Neutrality is important to the economy are certainly speaking the truth. Given the nature of our business, allow me to suggest that it may be significant for national security as well. The FCC must take *serious* and immediate action to put an abrupt and permanent end to this harmful practice and prevent other Internet service providers from following Comcast's example of selectively interfering with internet communications.

Bill McFadden
623 Harbor Drive
Annapolis, MD 21403

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. Gerald Miller
6104 Moyer Avenue
Baltimore, MD 21206

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. In addition, I myself have discovered that, despite the explicit setting of my e-mail profile to accept any and all messages and decide for myself what constitutes "spam," Comcast is actually blocking some of the very messages I expect to receive because of perceived behavior on the part of the sending domain that more professional services (e.g., gmail) do not see as a threat. Furthermore, when its interface permitted the "reporting" of spam, I learned upon inquiry that the messages thus reported were not sent with full header information to spam@uce.gov or the former uce@ftc.gov, but instead were "donated" to a consortium that presumes to have the expertise to design heuristics that will tell me what constitutes "spam," regardless of my own value system! The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

I must be living in a cave, because I hadn't heard about this. It doesn't surprise me. At the risk of sounding like a conspiracy freak; companies with monopolies like Comcast's almost inevitably begin acting like they are above the rights & laws of the people who keep them in business. Now that their actions have been exposed, I hope they (the responsible parties within Comcast) are suitably punished. This sort of under-handed invasion of customer's rights in no way can be tolerated. In this area, we already tolerate too much- lousy connections, iffy customer service, all at absurdly high prices. All we can do is hope that our government insist on honest business practices (ha!), and to remember that one of the founding principles of this country was freedom of speech. The internet is an amazing tool that promotes that freedom- don't take the "free" out of freedom. Thank you, Evan Parker

***** ->A free and open Internet maybe one of our last hopes
for a free and open society here in the United States. Do what's DECENT, do what's RIGHT: protect Internet Neutrality
against corporate bullies!<--- *****
***** If recent reports are accurate, Comcast went so far as to
pay people to fill seats so that members of the concerned public couldn't make themselves heard at public hearings! This
is a strong indicator of what such corporate giants are willing to do to fairness if the monitoring agency (the FCC!) that
WORKS FOR THE PUBLIC AND ITS INTERESTS doesn't exercise its responsibility properly.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Furthermore, the argument that Comcast needs to protect the limited "bandwidth" for all, by blocking certain types of file transfers of others, needs to be solved another way. Comcast and the other internet providers generate more than adequate income to reinvest in additional capacity. If they can not meet the demands of the market for internet bandwidth, they are in the wrong business. Using secret blocking strategies now, will only lead to much worse abuse in the future, and if allowed would give the companies an excuse not to invest in greater capacity, while the revenue continues to pour in.

Protect Net Neutrality! It is crucial both for small businesses and for free speech and open democracy. It was bloggers who opposed the Iraq war when the mainstream media was parroting the White House. Net Neutrality is too important to commercialize! I am starting a new online business and want people to freely contact me with out my having to pay a toll to the search engine and telecom companies. The big telecoms want to squelch my chance to jump into the marketplace. Keep the internet free and open! It is your duty to serve all of us, not just the lobbyists who pay for your lunch. (And I used to be a lobbyist, so I know what we are up against!) Thank you!

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.
